SCOPE OF INSPECTION

An inspection of this structure or structures was performed by a qualified inspector employed by this firm, to determine the presence or previous presence of an infestation of the listed organisms and is not intended to be a structural report. Neither is this a warranty as to absence of wood destroying organisms, and is governed by the conditions enumerated below.

1. If visible evidence of active or previous infestation is reported it should be assumed that some degree of damage may be present and this diagram identifies the structure(s) inspected and showing the location of such evidence. It is possible that damage may (as the date of this report) exist in unexposed areas of the structure or in areas which are inaccessible to visual inspection.
2. Evaluation of damage or possible damage that is indicated on the reverse side should be performed by a qualified inspector in the building trade.
3. This report is for, but not limited to those organisms for which treatment has been performed by this company.
4. This report covers only those structures listed on the reverse side, and is not intended to cover such items as fencing, planters, trellises, or landscape timers, etc. Any outbuilding must have a separate graph and report.
5. Inspection, including sounding and/or probing, was performed in only those areas which were readily accessible. Inaccessible areas not inspected include, but are not limited to areas obstructed by floor covering, wall covering, stucco exterior of foundation insulation, siding, fixed ceiling, insulation, furniture, appliances or other personal items.
6. This company makes no recommendations concerning any wood destroying fungi in any way, shape or form. This company assumes no responsibility for any wood destroying fungi, wood rot or mold situations.
7. The term wood boring beetles as used on the reverse side means only those beetles which are known to establish and maintain a continuing infestation in structures, such as but not limited, to the old house borer and powder post beetles.
8. This is not a structural or damage report. A wood destroying organism inspector is not ordinarily a construction or building trade expert and is therefore not expected to assess structural soundness. Evaluation and correction of possible damage which may have resulted from an active or previous infestation should be performed by a qualified inspector in the building trade.
9. If properly described on reverse side of this report is currently under a treatment warranty, additional restrictions may apply; refer to customer service agreement for additional restrictions or limitations of these warranties.
10. Conditions Conducive To Infestation - means conditions that exist in a structure that favor the development of wood-destroying organisms. These are limited to: cellulosic material underneath a building, wood in contact with the soil which has not been treated with preservative to a minimum preservation retention rate of .40 pounds per cubic foot for ground contact and ventilation that does not meet the requirements of the state.
11. Form II exclusions: A Form II letter is required by the Company, when a structure is not being treated to minimum treatment standards. Due to this fact any structure that required a Form II letter as part of the initial treatment may not qualify for a repair and treatment coverage. If Form II Block is check on the main contract (front page), the owner hereby agrees to sign Form II and not hold Company responsible for any damage or repairs associated with the deviations from the minimum treatment standards. The Customer releases the Company, its successors and/or assigns from liability for treatment, retreatment, or repair of any area associated with or identified on Form II letter,. If later treatment of these is elected by the Customer, the Customer agrees to be responsible for the preparation for treatment including but not limited removal of floor covering, decks, walls, porches, access panels, creating openings, EIFS (Stucco), foundation insulation, (RBI), similar foundation coverings and/ or staircases.
