adult male

nymph

larva

Dog Tick

adult female

adult male

nymph

larva

(examples are not shown actual size)

Tick Removal

Call today 410-484-7928 or visit thebrodyswatteam.com

Remove ticks immediately. They usually need to attach for 24 hours to transmit Lyme disease. Consult a physician if you remove an engorged deer tick.

Using a tick spoon:

- Place the wide part of the notch on the skin near the tick (hold skin taut if necessary)
- Applying slight pressure downward on the skin, slide the remover forward so the small part of the notch is framing the tick
- Continuous sliding motion of the remover detaches the tick
